

NUMDAM

Digitisation of Ancient Mathematics Documents

NUMérisation de Documents Anciens Mathématiques

A digitisation program supported by
and Ministère de la Recherche,
managed by the Cellule MathDoc.

Search and download archives of mathematical journals published in France

New display (March 2003)

Annales de l'institut Fourier (1949-1997)

Journées Équations aux dérivées partielles (1974-2000)

Publications mathématiques de l'IHÉS (1959-1997)

www.numdam.org

NUMDAM: aims

- Reinforce French mathematical journals (visibility, accessibility, durability).
- Hand down digitised archives of the French mathematical heritage to future generations and participate in international efforts with the same endeavour.
- Strive towards making this digitised mathematical heritage freely accessible.

National and International Co-operations

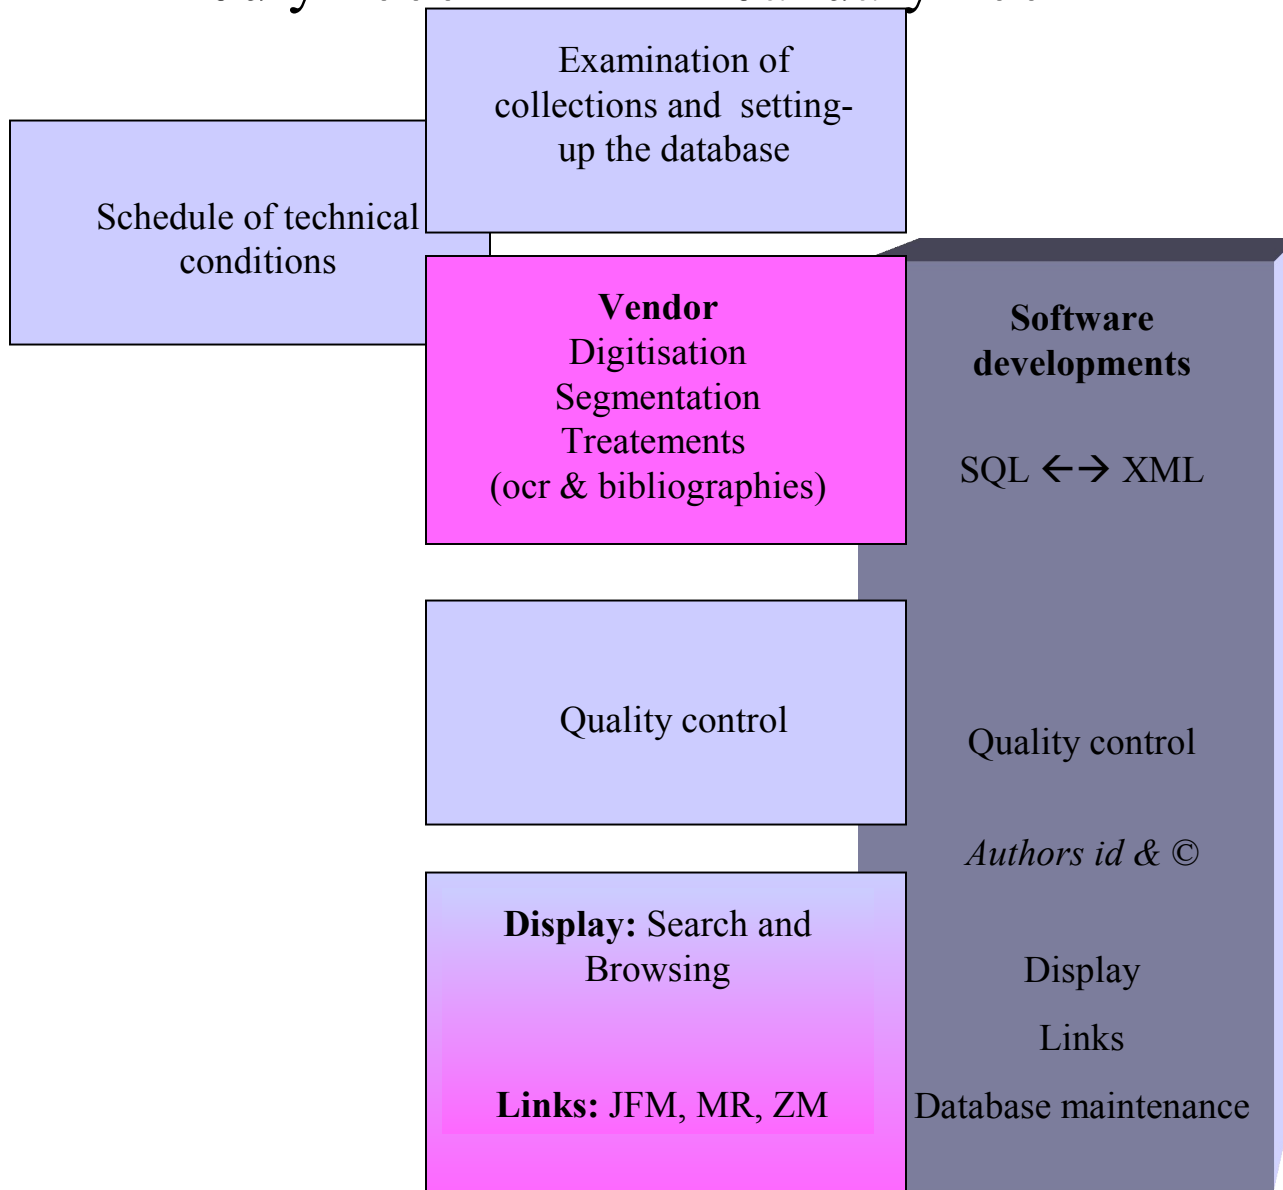

- Bibliothèque Nationale de France
 - Digital Mathematics Library
 - European Mathematical Society
- 6th FP projects

NUMDAM programme: overview

July 2000

January 2002

March 2003

Association des
Annales de l'Institut
Fourier, ÉNS, IHÉS,
GDR 2434, Société
mathématique de
France

Bases de données :
JFM, MR, ZM

Springer, Elsevier, ASENS
